

MC Snake™

Manage MC Cables in Minutes!

EC&M
Product
OF THE
Year 10
Category Winner

Replace your labor intensive EMT with MC cables and MC Snake to bring down the electrical costs!

Patented hand bendable cable tray (no cutting required) to go around obstacles in a building.

Cable trays nest together for easy material handling and cost effective and environmentally responsible shipping.

Trays quickly connect together with a single connector bolt.

Installs overhead directly into the concrete deck with its built-in mounting hardware.

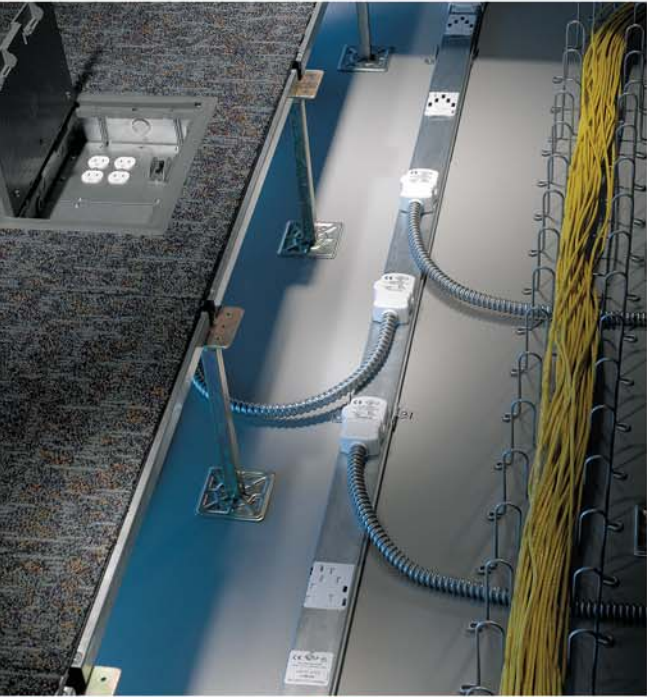

MC Cables are easily loaded into the MC Snake from the ground with an adjustable telescoping pole. Never a need to step on a ladder.

The Snake Tray® Advantage

Snake Tray has revolutionized cable management and power distribution with a stream of innovative products designed for the electrical industry to install quickly, reduce labor and material costs and drive down the total cost of construction.

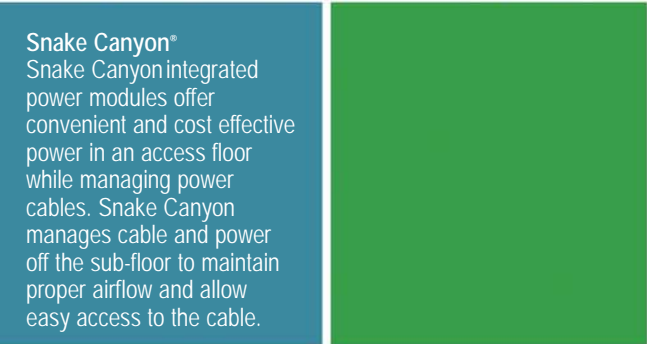

Snake Tray substantially reduces on-site install time to cut labor costs!

Snake Bus®

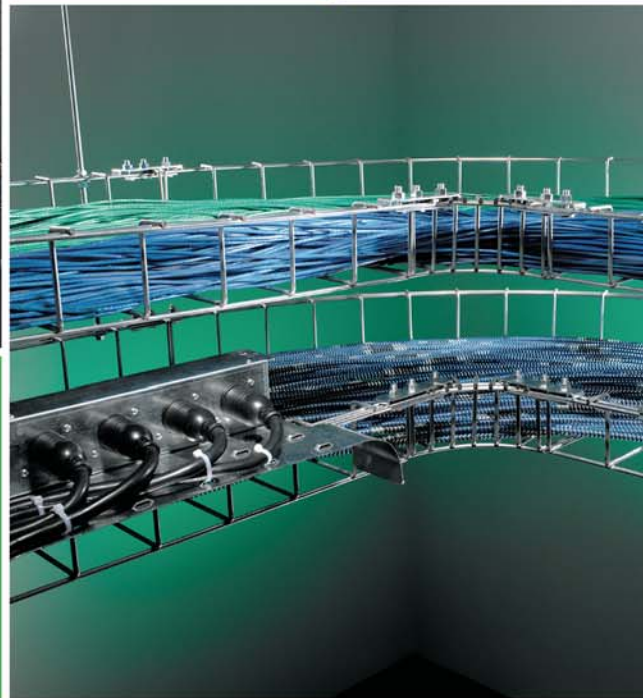

Snake Bus is green power distribution for access floors that is pre-configured for quick installations, moves and changes. Flexible power for workstations, call centers, trading desks and data centers.

Call our sales team to discuss your next project and we will show you how our products give you the advantage!

Snake Canyon®

Snake Canyon integrated power modules offer convenient and cost effective power in an access floor while managing power cables. Snake Canyon manages cable and power off the sub-floor to maintain proper airflow and allow easy access to the cable.

Mega Snake®

Mega Snake high capacity overhead cable tray comes in pre-manufactured sections to make it the fastest installing cable tray in today's market. Mega Snake patented mounting rail allows for a two point suspension and can easily accommodate power modules and other accessories.

Snake Box™

Snake Box recessed power module provides electrical receptacles without compromising the airflow in the data center. The box can accommodate 20 amp NEMA duplexes to 100 amp IEC 309 pin and sleeve connections.

Snake Tray® products are covered by one or more of the following patents:
#6637704, #6637165, #6463704,
#6460812, #6449912, #6361000,
#6347493, #6019323, #6347493,
#6449912, #6460812, #5953870,
#5839702, #6926236, #7168212
Other Patents Pending.
