

NEW PRODUCT RELEASE

# Snake Air™

**Snake Tray®** is proud to announce **Snake Air™** the airflow manager for data centers. With today's servers producing excess heat, controlling airflow has become a critical factor in maintaining a proper temperature in the data center. Snake Air's design blocks stray air from escaping from under the raised floor to prevent overheating sensitive equipment in the data center.

***Keep your data center air where it belongs. Save money on materials, save money on installation, save money on temperature control, use Snake Air™!***

- Lowers cost of cooling the data center
- Prevents overheating equipment
- No hardware or tools required to install

Snake Tray™ products are covered by one or more of the following patents:  
#6,637,704, #6,637,165, #6,463,704, #6,460,812, #6,449,912, #6,361,000,  
#6,347,493, #6,019,323, #5,953,870, #5,839,702, #6,926,236  
and AUS #737,813. Other Patents Pending.
